

```
import Assign17Pac.Assign17Pac1Class1;
//import Assign17Pac.MyPackage1Class2;
class Assign17
{
    public static void main(String[]args)
    {
        Assign17Pac1Class1 m1= new Assign17Pac1Class1();
        MyPackage1Class m2= new MyPackage1Class();
        m1.show_result1();
        //m2.show_result2(); // error..because MyPackage1Class2 is not
public, we can't be accessed from outside package
    }
}
```
