

```
import Assign16Pac1.Assign16PacClass1;
import Assign16Pac1.Assign16PacClass2;
class Assign16
{
    public static void main(String[]args)
    {
        Assign16PacClass1 a1=new Assign16PacClass1();
        Assign16PacClass2 a2=new Assign16PacClass2();
        int value = a2.get_data();
        a1.fibonacci(value);
    }
}
```
